TipSoft Alerts

TipSoft Alerts is a text messaging and email alert service that allows the broadcast of alerts and other information to the public.

FEATURES:

- Send both text message and email alerts to your community.
- Alerts can include images and be cross-posted to Facebook and Twitter.
- Public signup forms for alerts can be added to your web page.
- Widget to display active alerts can also be added to your web page.
- Alerts can be set to expire automatically after a specified time.
- Recipients can respond anonymously to alerts.
- Video tutorials are available to help you quickly get started.
